DOOR INDUSTRY

WB 1K BASIC PRIME WHITE

WB 1K Basic Prime White is our offering for pure-white wood primers, providing high covering power and fast drying times with only the highest quality to spare.

Basic Prime White is a single-component water-based primer, and has been made available in several market-standard primer colours, including White Ral 9010 and Ice White.

Viron has constantly strived to galvanise the industry with the manufacture and sale of water-based coating systems, prioritising environmental sustainability and eco-friendliness above our competition.

We are confident that Basic Prime White is the most versatile and multi-use primer on the market: it provides a smooth finish to doors and panelling that is second to none at this price range, and is applicable via manual/auto-spray and vacuum technology on doors, profiles, and panelling.

WB PRIME WHITE Vacuum

Basic Prime White is also well-suited for profiling and wall panelling jobs alike via vacuum technology.
