

ULTRA

PRIME 1K

ULTRA PRIME 1K

Ultra Prime 1K is our optimised solution for your industrial primer-based needs, guaranteed to provide the utmost combination of maximum coverage and long-lasting, durable white on doors and panels.

Ultra Prime 1K is our optimised solution for interior surfaces such as panelling and profiling. It's provides you with an environmentally friendly, water-based primer coating, offering top-of-the-line pigment coverage that is leaps ahead of conventional solvent based systems.

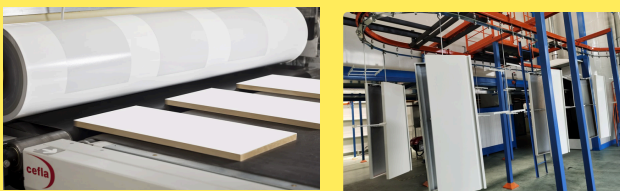

ULTRA PRIME 1K

Ultra Prime 1K serves as both a sealer and top coat, effectively cutting costs for the manufacturer in half; because of this dual utility, the finished surface could also act as its own final top coat if deemed necessary. Ultra Prime 1K may be used in auto-spray or electrostatic coating machines, providing transfer efficiencies of up to 70%.

Application of Ultra Prime 1K may also be paired with UV-roller technology, furthering transfer efficiency to $\leq 98\%$. This application method is exclusive to flat surfaces.

Viron has constantly strived to galvanise the industry with the manufacture and sale of water-based coating systems, prioritising environmental sustainability and eco-friendliness above our competitors.
