Aqua UV CLEAR

Aqua UV CLEAR was one of Viron's first of many great innovations. Viron was the first to formulate a functioning and effective auto spray-based application system for door coatings back in 2011, and was the first major provider of this technology in Indonesia during early 2018.

Our developments have paved the way for greater efficiencies and a reduction of product waste in the coating industry. Since then, we have provided our customers with a coating system that has consistently outperformed its competitors.

LINE LAYOUT

Aqua UV CLEAR

rich film, easy sanding properties, and a fast curing time of less than 10 minutes.

Aqua UV CLEAR is available in various gloss levels and can be recolored to match your preferred wood tone. The product delivers a soft touch, excellent leveling, and superior surface resistance.

Aqua UV CLEAR is compatible with application using automatic spray machines, making it both efficient and versatile.

Aqua 1K CLEAR is a water-based, single-component coating made from acrylic resin, offering a transparent finish. It boasts excellent durability, resistance, and surface hardness, making it ideal for interior flat doors and furniture.

This coating is specially designed for streamlined applications, whether through **shorten automatic spray line or manual spray systems on site application.**

Aqua 1K Clear combines superior environmental performance with proven application methods, ensuring consistent results and high-quality finishes.
